Subject: TES pilot study meeting

Dear All,

Based on your responses the meeting is now scheduled for August 7 and 8 in Richmond, A-Building. I suggest we start at 9:30 AM on both days (if your travel plans make this a good starting time). On August 8 the meeting will adjourn around 2 PM. We might try to get Georg Schepers on the phone in the morning of one of the two days (Dr. Roemer: please let him know about our schedule and any materials that are distributed.).

The main objectives are:

- To refine the study design for the pilot study (technical and conceptual issues), in particular
 - reviewing the input from the CRO candidates;
 - reviewing the input from the Boston presentation;
 - revisiting the selected biomarkers of susceptibility/potential health effect;
 - refining details of the determinations of the selected biomarkers of exposure;
 - discussion the exclusion criteria and the questionnaire status
- To review the CRO candidate's responses (expected for August 2) toward a decision, who we should contract for the study.
- To plan to visit the 'finalists' for the CRO (which will hopefully involve several of you).

The meeting agenda will be distributed early next week. I will also distribute any material relevant in advance to the meeting.

Tony and Richard, since you primarily suggested this meeting:
could you send me a list of what technical and conceptual issues, in your opinion should be resolved?

Any comment to make this a successful meeting (Successful outcome: Strengthened final pilot study design!!!) are highly welcome.

Kind regards,
Roger
